

Timothy Parks Construction, Inc. is looking for an installer. Must be able to mount and install flat panel TV's (LCD and plasma) as well as do simple stereo wiring and configuration work. We're seeing an explosion in the number of consumers who want sets installed or cables run, so this is an opportunity to get into a growing part of the company. We always send out two person teams, so you do not have to worry about being on your own. Pay will depend on experience; possible salary and/or commission split depending on what seems appropriate. We are willing to consider junior candidates with appropriate references and skills.
